

Part III Description

---

of collection Presidential Aircraft Logs & Manifests Accession number 66-1

---

Each flight log for Air Force One includes a mission number (flight number-aircraft type-tail number), the date, the flight origin and destination, departure and arrival times, time spent in flight, and the number of miles flown. The helicopter logs do not include a mission number nor a figure for total flight time.

From November 22, 1963, through December 9, 1966, both Air Force One and helicopter logs include passenger manifests listing the names of passengers aboard. After mid-December 1966, the logs no longer include manifests.

The 1968 log includes a summary of overall mileage for 1968 and January 1969 air travel.
