Dear Jim:

Here is what the Budget Bureau tells me:

"The 1969 budget will identify no specific funds for these countries. It will, however, contain about \$300 thousand for renewal of grants to students from these countries who wish to continue studying in the United States.

If relations improve with any of the countries, State would request release of funds held in reserve under the 2%-10% exercise for FY 1968 and a supplemental for FY 1969.

Enough flexibility exists in the CU program to quickly take advantage of a small number of opportunities to place individual scholars or researchers in these countries should it appear politically advantageous.

The NSC Special Committee issued a general guidance to terminate economic aid in all countries that broke relations last June. The purpose was to show that U.S. patience with the Arab world had limits when our property was attacked, and our diplomatic missions were evicted on false charges.

This general guidance, along with considerations of congressional relations and pressures to reduce their activities under the 2%-10% exercise, led the Department to exclude a specific request for funds for these countries."

Obviously this fell under a general policy, and was not the result of an intervention by someone "higher than the Secretary of State."

Dear Mr. President:

On July 31, 1964, cameras of the United States Spacecraft Ranger VII successfully photographed the surface of the Moon from close range. These photographs represent a very great extension in our knowledge of the Moon. The detail of our perception has improved more in this one step than in the three centuries of evolution of the earth-bound telescope. Having dedicated their efforts to the exploration of outer space for peaceful purposes, the people of the United States hope that this knowledge -- and what is learned in the continuing explorations of the future -- will work to the ultimate benefit of mankind in all lands.

It is, therefore, an honor and a privilege to present to you and your people on behalf of the people of the United States this special set of photographs of the Moon taken on the historic flight of the Ranger VII. These photographs symbolize the continuing desire of the United States that the benefits of this age of scientific discovery may be shared among all nations and all peoples for the cause of peace and human progress.

Sincerely,

LYNDON B. JOHNSON

His Excellency
Abdullah al-Sallal
President of the Yemen Arab Republic
