28th February, 1966

Dear Mr. President,

On behalf of the Jamaica Government, I would like to bring to your attention the gallant help which was provided to our Jamaican Fire Brigade, by the navy men from the U.S.S. "Johnston" and the U.S.S. "Suribachi".

Last evening in the business section of downtown Kingston, we suffered a tragic fire which completely destroyed the Myrtle Bank Hotel. Had it not been for the quick assistance which the Captains of both these vessels provided, a major section of downtown Kingston would possibly have been devastated. Through Commander John T. Mingo and Captain D.B. Harris, the entire fire fighting units of both vessels voluntarily came to our assistance and their help cannot be over estimated.

As Commander in Chief of your country's armed forces, do accept, on behalf of the Jamaican Government, our heartfelt appreciation for this assistance.

Yours sincerely,

(D.B. Sangster)

Dear Mr. Prime Minister:

Thank you for your letter of July 22nd regarding the departure from the United States of West Indian students.

As a general proposition, I want to assure you that we attempt to apply our existing immigration laws with real humanity. Only when a foreign student fails to comply with the liberal and flexible regulations governing his stay does our Immigration and Naturalization Service take corrective action. That Service always tries to do its job with understanding.

With respect to the specific recent cases involving West Indian students, I understand that detailed information has already been forwarded to you through our Embassy in Kingston. I hope that when your representatives have had an opportunity to examine these details, they will be able to report to you that the actions taken were reasonable and necessary, in the circumstances, and that our authorities have been careful to avoid any harsh or arbitrary action.

May I take this opportunity to extend best wishes for your continued good health.

Sincerely,

His Excellency

Dear Mr. President,

I have just had brought to my attention the case of a deportation order made by your Immigration Department against ten students from the West Indies, who in order to acquire an education were supplementing their means of subsistence by doing odd jobs.

Many of our Doctors and other professional people over the years have acquired their education in this manner and fortunately no previous action was taken against them.

I feel certain that the plight of these young people cannot but cause concern and sympathy on their behalf, and I do ask for your careful consideration and intervention in this matter.

I do not know how many of them are Jamaicans, but my appeal is made on behalf of all of them. Everyone of these young people is a potential ambassador of goodwill. The knowledge they gain is vital to the development of democracy in small countries with restricted means to provide all the technological and educational facilities that are required, to raise the standards of people struggling to improve themselves to play their part in building a better world.

Poor as we are, we do not prevent students from abroad from working in our country - we regard this as a humane act, and to throw out students as was reported in the press was a cruel act.
