

"MASTER FILE" INDEX

The "Master File" is composed of extra copies of out-going communications, a few cross-references to names appearing in letters or memoranda, and a few incoming letters, all arranged by name in alphabetic folders. Very few organizational names are included in the index. The index serves as an aid in locating material requested by the name of a person when it is filed by subject. The "Master File" carbon copies are on yellow paper.

The file serves as an index to the Subject Files, Congressional Files, Case Files, General Files, and Academy Files. The file location of the original file, which usually includes the incoming letter, attachments, and another copy of the outgoing letter, is noted in the upper right corner of the "Master File" copy.

The "Master File" Index was originally filed in three separate series, the 1961, 1962 and 1963 "Master Files." Each series consisted of material from one year filed in a standardized set of 300 folders. When the LBJ Library staff began processing the VP Papers, they integrated the three files to facilitate use of the material.

The standardized folders each contain a portion of the alphabet and are numbered sequentially. Common names are frequently filed separately in the folder preceding the folder in which they would normally be filed. When this happens, the folder in which they would normally occur displays an asterisk (*). For example: the folder, "Bro* - Brt 33" does not contain the name "Brown." The preceding folder is "Brown 32."

Digitization note: Some of these folders have been scanned and are available on DiscoverLBJ.org. See folder title list to identify scanned folders.
