January 27, 1967

EXECUTIVE SECRETARY

MEMORANDUM FOR THE PRESIDENT

Subject: Space Activities

1. Launches

a. ESSA IV, a weather satellite containing two Automatic Picture Transmission Units (APT's), was launched into orbit from the Western Test Range January 26. Each picture taken by the satellite's cameras will cover four million square miles of the earth. They can be acquired by about 180 receiving stations in more than 25 countries.

b. The Soviet Union launched Cosmos 139 into a low altitude earth orbit January 25.

c. The Department of Defense launched a military satellite into a near polar orbit from the Western Test Range January 14.

2. Space Treaty. The recently concluded Outer Space Treaty will be signed January 27 in Washington, London, and Moscow. No date has yet been set for the Senate hearings on U. S. ratification.

3. Congress

a. The Senate Committee on Aeronautical and Space Sciences has heard from witnesses representing NASA, the Aerospace Industries Association, the Department of Transportation, the FAA, and the Air Transport Association during its current hearings into aeronautical research. Remaining witnesses are scheduled for February 7 from the Department of Defense and the National Aeronautics and Space Council. The discussions have centered on the extent, adequacy, and coordination of U. S. aeronautical research and development among the various government agencies and industry. Attention is being given to noise abatement and air safety.

b. The House Science and Astronautics Committee's annual panel meeting January 24-26 on "Government Science and International Policy" was considered by those attending as being very successful. Secretary Rusk was the keynote speaker, and foreign participants were from Norway, Japan, The Netherlands, India, Brazil, and Switzerland.

THE WHITE HOUSE
RECEIVED

1967 JAN 27 AM 11 23

1. The President has received a letter from the Secretary of Defense, Mr. McNamara, dated January 26, 1967, regarding the proposed revision of the National Security Council Directive (NSC) 5412, which deals with the subject of the control of nuclear weapons.

2. The President has also received a letter from the Secretary of State, Mr. Dean Rusk, dated January 26, 1967, regarding the same subject.

3. The President has further received a letter from the Secretary of the Joint Chiefs of Staff, Mr. Johnson, dated January 26, 1967, regarding the same subject.

4. The President has also received a letter from the Secretary of the National Security Council, Mr. McGeorge Bundy, dated January 26, 1967, regarding the same subject.

5. The President has further received a letter from the Secretary of the National Security Council, Mr. McGeorge Bundy, dated January 26, 1967, regarding the same subject.

6. The President has also received a letter from the Secretary of the National Security Council, Mr. McGeorge Bundy, dated January 26, 1967, regarding the same subject.

7. The President has further received a letter from the Secretary of the National Security Council, Mr. McGeorge Bundy, dated January 26, 1967, regarding the same subject.

4. Trans-Pacific Communications. Television, radio, telephone, and telegraph communication between Asia and the United States via communications satellites was inaugurated January 26 by the Communications Satellite Corporation. The new link to Asia was made possible by an Intelsat II, launched on January 11.

5. Luna 12. The Soviet moon-orbiting satellite launched last October is now silent, according to a Soviet announcement. During its lifetime the satellite took pictures, studied radiation, and reported regarding the density of the meteoric substance on the moon.

6. Pending Launches

a. The U. S. Lunar Orbiter III is scheduled for launch February 2. Its two picture-taking predecessors have been very successful.

b. Apollo, to be launched by an Up-rated Saturn I, is scheduled for earth orbit with its three-man crew February 21. This will be the first manned Apollo launch.

7. Saturn Test Failure. The upper stage of the Saturn launch vehicle series exploded and burned on its static test stand January 20. The test stand was severely damaged and six to twelve months will be required to repair it. A second test stand, however, is ready to resume testing the stage. The particular S-IV which exploded was being prepared for the first manned Saturn V Apollo flight late this year. The accident is being investigated, and another S-IV stage is being readied for testing.

MEMORANDUM FOR THE PRESIDENT

FROM: Bob Fleming

News coverage for the Space Treaty signing today will be similar to that at bill signings. Because the subject is of major interest, the networks need electronic cameras but they do not plan live coverage. They will video-tape in their studios in order to have material in time for the evening news shows.

We have told them that this is a ceremonial, rather than news-making, event.

USIA and the Canadians also will have film cameras in the usual camera area.

TREATY ON PRINCIPLES GOVERNING THE ACTIVITIES OF STATES
IN THE EXPLORATION AND USE OF OUTER SPACE,
INCLUDING THE MOON AND OTHER CELESTIAL BODIES

The States Parties to this Treaty,

Inspired by the great prospects opening up before mankind
as a result of man's entry into outer space,

Recognizing the common interest of all mankind in the progress
of the exploration and use of outer space for peaceful purposes,

Believing that the exploration and use of outer space should
be carried on for the benefit of all peoples irrespective of the
degree of their economic or scientific development,

Desiring to contribute to broad international co-operation in
the scientific as well as the legal aspects of the exploration and
use of outer space for peaceful purposes,

Believing that such co-operation will contribute to the
development of mutual understanding and to the strengthening of
friendly relations between States and peoples,

Recalling resolution 1962 (XVIII), entitled "Declaration of
Legal Principles Governing the Activities of States in the
Exploration and Use of Outer Space", which was adopted unanimously
by the United Nations General Assembly on 13 December 1963,

Recalling resolution 1884 (XVIII), calling upon States to refrain from placing in orbit around the Earth any objects carrying nuclear weapons or any other kinds of weapons of mass destruction or from installing such weapons on celestial bodies, which was adopted unanimously by the United Nations General Assembly on 17 October 1963,

Taking account of United Nations General Assembly resolution 110 (II) of 3 November 1947, which condemned propaganda designed or likely to provoke or encourage any threat to the peace, breach of the peace or act of aggression, and considering that the aforementioned resolution is applicable to outer space,

Convinced that a Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies, will further the Purposes and Principles of the Charter of the United Nations,

Have agreed on the following:

Article I

The exploration and use of outer space, including the moon and other celestial bodies, shall be carried out for the benefit and in the interests of all countries, irrespective of their degree of economic or scientific development, and shall be the province of all mankind.

Outer space, including the moon and other celestial bodies, shall be free for exploration and use by all States without

discrimination of any kind, on a basis of equality and in accordance with international law, and there shall be free access to all areas of celestial bodies.

There shall be freedom of scientific investigation in outer space, including the moon and other celestial bodies, and States shall facilitate and encourage international co-operation in such investigation.

Article II

Outer space, including the moon and other celestial bodies, is not subject to national appropriation by claim of sovereignty, by means of use or occupation, or by any other means.

Article III

States Parties to the Treaty shall carry on activities in the exploration and use of outer space, including the moon and other celestial bodies, in accordance with international law, including the Charter of the United Nations, in the interest of maintaining international peace and security and promoting international co-operation and understanding.

Article IV

States Parties to the Treaty undertake not to place in orbit around the Earth any objects carrying nuclear weapons or any other kinds of weapons of mass destruction, install such weapons on celestial bodies, or station such weapons in outer space in any other manner.

Article VI

States Parties to the Treaty shall bear international responsibility for national activities in outer space, including the moon and other celestial bodies, whether such activities are carried on by governmental agencies or by non-governmental entities, and for assuring that national activities are carried out in conformity with the provisions set forth in the present Treaty. The activities of non-governmental entities in outer space, including the moon and other celestial bodies, shall require authorization and continuing supervision by the appropriate State Party to the Treaty. When activities are carried on in outer space, including the moon and other celestial bodies, by an international organization, responsibility for compliance with this Treaty shall be borne both by the international organization and by the States Parties to the Treaty participating in such organization.

Article VII

Each State Party to the Treaty that launches or procures the launching of an object into outer space, including the moon and other celestial bodies, and each State Party from whose territory or facility an object is launched, is internationally liable for damage to another State Party to the Treaty or to its natural or juridical persons by such object or its component parts on the Earth, in air space or in outer space, including the moon and other celestial bodies.

Article VIII

A State Party to the Treaty on whose registry an object launched into outer space is carried shall retain jurisdiction and control over such object, and over any personnel thereof, while in outer space or on a celestial body. Ownership of objects launched into outer space, including objects landed or constructed on a celestial body, and of their component parts, is not affected by their presence in outer space or on a celestial body or by their return to the Earth. Such objects or component parts found beyond the limits of the State Party to the Treaty on whose registry they are carried shall be returned to that State Party, which shall, upon request, furnish identifying data prior to their return.

Article IX

In the exploration and use of outer space, including the moon and other celestial bodies, States Parties to the Treaty shall be guided by the principle of co-operation and mutual assistance and shall conduct all their activities in outer space, including the moon and other celestial bodies, with due regard to the corresponding interests of all other States Parties to the Treaty. States Parties to the Treaty shall pursue studies of outer space, including the moon and other celestial bodies, and conduct exploration of them so as to avoid their harmful contamination and also adverse changes in the environment of the Earth resulting from the introduction of extraterrestrial matter and, where necessary, shall adopt appropriate measures for this purpose. If a State Party to the Treaty has

on to believe that an activity or experiment planned by it
ts nationals in outer space, including the moon and other
stial bodies, would cause potentially harmful interference with
ivities of other States Parties in the peaceful exploration and
of outer space, including the moon and other celestial bodies,
shall undertake appropriate international consultations before
eeding with any such activity or experiment. A State Party
he Treaty which has reason to believe that an activity or
riment planned by another State Party in outer space, including
moon and other celestial bodies, would cause potentially
ful interference with activities in the peaceful exploration
use of outer space, including the moon and other celestial
es, may request consultation concerning the activity or
riment.

Article X

In order to promote international co-operation in the
oration and use of outer space, including the moon and other
stial bodies, in conformity with the purposes of this Treaty,
States Parties to the Treaty shall consider on a basis of
ity any requests by other States Parties to the Treaty to be
ded an opportunity to observe the flight of space objects
shed by those States.

The nature of such an opportunity for observation and the
tions under which it could be afforded shall be determined by
ment between the States concerned.

Article XI

In order to promote international co-operation in the peaceful exploration and use of outer space, States Parties to the Treaty conducting activities in outer space, including the moon and other celestial bodies, agree to inform the Secretary-General of the United Nations as well as the public and the international scientific community, to the greatest extent feasible and practicable, of the nature, conduct, locations and results of such activities. On receiving the said information, the Secretary-General of the United Nations should be prepared to disseminate it immediately and effectively.

Article XII

All stations, installations, equipment and space vehicles on the moon and other celestial bodies shall be open to representatives of other States Parties to the Treaty on a basis of reciprocity. Such representatives shall give reasonable advance notice of a projected visit, in order that appropriate consultations may be held and that maximum precautions may be taken to assure safety and to avoid interference with normal operations in the facility to be visited.

Article XIII

The provisions of this Treaty shall apply to the activities of States Parties to the Treaty in the exploration and use of outer space, including the moon and other celestial bodies, whether such

activities are carried on by a single State Party to the Treaty or jointly with other States, including cases where they are carried on within the framework of international inter-governmental organizations.

Any practical questions arising in connection with activities carried on by international inter-governmental organizations in the exploration and use of outer space, including the moon and other celestial bodies, shall be resolved by the States Parties to the Treaty either with the appropriate international organization or with one or more States members of that international organization, which are Parties to this Treaty.

Article XIV

1. This Treaty shall be open to all States for signature.

Any State which does not sign this Treaty before its entry into force in accordance with paragraph 3 of this article may accede to it at any time.

2. This Treaty shall be subject to ratification by signatory States. Instruments of ratification and instruments of accession shall be deposited with the Governments of the United States of America, the United Kingdom of Great Britain and Northern Ireland and the Union of Soviet Socialist Republics, which are hereby designated the Depositary Governments.

3. This Treaty shall enter into force upon the deposit of instruments of ratification by five Governments including the Governments designated as Depositary Governments under this Treaty.

4. For States whose instruments of ratification or accession are deposited subsequent to the entry into force of this Treaty, it shall enter into force on the date of the deposit of their instruments of ratification or accession.

5. The Depositary Governments shall promptly inform all signatory and acceding States of the date of each signature, the date of deposit of each instrument of ratification of and accession to this Treaty, the date of its entry into force and other notices.

6. This Treaty shall be registered by the Depositary Governments pursuant to Article 102 of the Charter of the United Nations.

Article XV

Any State Party to the Treaty may propose amendments to this Treaty. Amendments shall enter into force for each State Party to the Treaty accepting the amendments upon their acceptance by a majority of the States Parties to the Treaty and thereafter for each remaining State Party to the Treaty on the date of acceptance by it.

Article XVI

Any State Party to the Treaty may give notice of its withdrawal from the Treaty one year after its entry into force by written notification to the Depositary Governments. Such withdrawal shall take effect one year from the date of receipt of this notification.

Article XVII

This Treaty, of which the English, Russian, French, Spanish and Chinese texts are equally authentic, shall be deposited in the archives of the Depositary Governments. Duly certified copies of this Treaty shall be transmitted by the Depositary Governments to the Governments of the signatory and acceding States.

Name	Date
<i>M. Ratchford</i>	2-14-67

This Treaty, of which the English, Russian, Spanish and Chinese texts are equally authentic, shall be deposited in the archives of the Depository Government. Only certified copies of this Treaty shall be transmitted by the Depository Government to the Governments of the signatory and acceding States.

MEMORANDUM FOR MR. WALT W. ROSTOW
THE WHITE HOUSE

Subject: Signing of Outer Space Treaty

In accordance with Marvin Watson's telephone conversation with Leonard Meeker, I am sending you this memorandum to indicate the arrangements now contemplated for the signing of the Outer Space Treaty on Friday, January 27:

(1) Physical arrangements. The lectern for the President will be set up on the east side of the East Room. To the right of this lectern will be a long table used for the actual signing. At the outset there will be four chairs, for the Ambassadors of the USSR and UK, for Ambassador Goldberg, and for Secretary Rusk. To the right of this table will be seats for the Chiefs of Diplomatic Mission who are going to sign the Treaty after the three depositary governments have signed.

(2) Scenario. The ceremony is scheduled to begin at 5:00. It will be opened by the President making a short statement. A suggested text of this has been forwarded to the White House. Immediately thereafter, Secretary Rusk will make brief remarks, and Ambassador Goldberg will read a message from UN Secretary-General U Thant. The Treaty will then be signed by the four representatives of the three depositary governments. When they have signed, they will leave the table and be greeted by the President. One chair would then be left at the table, and the Chiefs of Diplomatic Mission will then sign the Treaty, one after another in the order in which the Missions have presented their Governments' authorization to sign the Treaty. The State Department Office of Protocol

Copies sent to Mrs. Senate

will see to it that each Chief of Diplomatic Mission arrives at the table in the right order. The President would remain near the signing table, and be able to greet each of the Ambassadors after signing. It is contemplated that the entire ceremony could be completed in approximately twenty minutes.

A reception for participants and invited guests will be held immediately following the ceremony.

THE PRESIDENT, REPORT DELIVERY

THE WHITE HOUSE

I WISH IT WERE POSSIBLE FOR ME TO BE PRESENT IN WASHINGTON, LONDON AND MOSCOW AT THE SAME TIME ON THE AUSPICIOUS OCCASION OF THE SIGNING OF THE TREATY OF PRINCIPLES GOVERNING THE ACTIVITIES OF STATES IN THE EXPLORATION AND USE OF OUTER SPACE, INCLUDING THE MOON AND OTHER CELESTIAL BODIES. MAY I CONVEY TO YOU MY SINCERE CONGRATULATIONS AND EXPRESS MY FEELING OF DEEP SATISFACTION

AT THIS HISTORIC EVENT IN INTERNATIONAL RELATIONS - A FEELING WHICH, I AM CERTAIN, IS SHARED BY ALL PEOPLES EVERYWHERE. I AM PARTICULARLY GRATIFIED THAT THE UNITED NATIONS WAS ABLE TO MAKE A SIGNIFICANT CONTRIBUTION TOWARDS THIS MAJOR ACHIEVEMENT. ONE CONQUEST OF SPACE GIVES RISE TO MANS NEW PROBLEMS BECAUSE OF THE TERRIFYING MILITARY POTENTIALITIES INVOLVED AND ALSO BECAUSE OF THE IMPACT OF SPACE TECHNOLOGY ON OUR PHYSICAL ENVIRONMENT. AS MAN VENTURES INTO SPACE HE CANNOT RELY SOLELY ON HIS SCIENTIFIC AND TECHNOLOGICAL KNOWLEDGE, GREAT AS IT MAY BE. HE MUST EQUALLY DEPEND ON LEGALLY BINDING UNIVERSAL STANDARDS

FORM 0805 PRINTED BY THE STANDARD REGISTER COMPANY, U. S. A.

FORM 0805 PRINTED BY THE STANDARD REGISTER COMPANY, U. S. A.

OF CONDUCT, PROGRESSIVELY DEVELOPED AS SCIENCE UNRAVELS THE MYSTERIES OF SPACE. IT IS BOTH URGENT AND NECESSARY THAT THE POWERFUL FORCES GENERATED BY HUMAN INGENUITY BE KEPT UNDER CONTROL AND UTILIZED FOR THE BENEFIT OF HUMANITY AND THE STRENGTHENING OF PEACE. IT IS MOST GRATIFYING TO SEE THAT THE PROBLEMS OF EXPLORING OUTER SPACE ARE BEING SOLVED THROUGH POSITIVE AND SUSTAINED INTERNATIONAL ACTION AND MEASURES WITHIN THE FRAMEWORK OF THE UNITED NATIONS. I HAVE NO DOUBT THAT THIS TREATY WILL NOT ONLY GREATLY REDUCE THE DANGER OF CONFLICT IN SPACE, BUT ALSO IMPROVE INTERNATIONAL CO-OPERATION AND THE PROSPECTS OF PEACE

IT 47

ON OUR OWN PLANET. THE ANTARCTIC TREATY OF 1959, THE TEST BAN TREATY OF 1963 AND THE PRESENT TREATY ARE LANDMARKS IN MAN'S MARCH TOWARDS INTERNATIONAL PEACE AND SECURITY. I FERVENTLY HOPE THAT THESE ACHIEVEMENTS WILL BE SHORTLY FOLLOWED BY SIMILAR AGREEMENTS ON NON-PROLIFERATION OF NUCLEAR WEAPONS AND OTHER STEPS TOWARDS GENERAL AND COMPLETE DISARMAMENT. HIGHEST CONSIDERATION

U_XTHANT SECRETARY-GENERAL UNITED NATIONS.
